

Homeoagora
Meeting of Equals

by Manuel Fernandez
January 22, 2021

Background

What inspired me to create **Homeoagora** comes from a place dear to my heart. I met my homeopathic doctor in 2002 at a very difficult time. Years later, I traveled to other countries to work and many times I tried to find a homeopath who could replace my doctor who was in Venezuela at that time. But to my surprise I couldn't find one who practiced homeopathy like him.

In 2009 I started together with a friend in Argentina a magazine about self-discover/spirituality/yoga (https://issuu.com/sivani08/docs/03_revista_despertar_espiritual_no_v_dic_09_vnz) that were distributed in Venezuela and in Argentina. I interviewed my doctor and started looking for different therapeutic healing venues to promote in the magazine.

On this journey I understood that there were many misunderstandings that led beneficial healing therapies do not occupy their rightful place within the medical spectrum.

Abstract

Homeoagora is built to give homeopathic doctors and the patient a space to interact. Doctors can promote themselves and share their experiences. Each doctor has a unique experience with their patients, so each publication has a great value to other doctors, patients and future homeopaths. In addition, it is necessary to build a network of highly committed and human-quality doctors to propel Homeopathy to its rightful place within the medical evolution spectrum. And in order to create this network with the highest standards of transparency and quality, this application will work under blockchain technology with a scheme that allows Patients, Doctors and those we will call Workers to interact, and each one to be benefited economically and humanely by their contribution.

Features

- Read free content about homeopathy
- Get rewarded for validating, translating and generating content on the network
- Get rewarded with shares for validating new homeopaths (also doctors will be rewarded with shares)
- Find quality homeopaths close to your location
- Interact with your homeopath, get support, store your medical history, reserve appointments, use your rewards to pay your medical consultation

Information

Homeoagora will show the information as the newspapers typically do on the web. However each homeopathic doctor will have their own domain and will look like a separate profile page. Patients will not have this option, they will shown as a user of the system. The main information displayed in the top bar will be:

About

In the main page will show information about our mission and in the doctor page will show information about the doctor.

Homeopaths

In this section will be displayed a list of homeopaths publicly available and you can search by location and many more variables

Categories

In the categories the content is separated by the characteristics of the information. At the beginning the categories will be News, Interviews, Publications, Articles and Remedies but could be added new ones in the future.

Search

From the main page it will be able to search in the entire ecosystem through patients, doctors, publications, etc.

Also will be links to secondary information like FAQ, Pricing, Tutorials ,Our Team, Events, Careers, Contact

Design

The design will be focus in a blue/black/white medical theme. The main page will have the **Homeoagora** logo on the top-left corner and the doctor page will have the doctor logo or signature.

Main Page

In the main page where will show the recent and priority publications as the newspapers typically do on the web.

The screenshot displays the Homeoagora website interface. At the top, a dark blue header contains the 'Homeoagora' logo on the left, followed by 'Follow Us' and 'Languages' dropdown menus. On the right side of the header are 'Login' and 'Become a member' buttons. Below the header, a navigation bar includes 'About us', 'Homeopaths', and 'Categories' with a dropdown arrow. A search bar is positioned on the right side of this navigation bar. The main content area features a large featured article on the left with a photo of a doctor in a white coat, the title 'Homeopathy, The Medicine of the Individual', and a sub-label 'INTERVIEWS'. To the right of this article is a 'NEWS' section with a headline 'New Coronavirus: All Eyes On India' and a corresponding image of coronavirus particles. Below the news section is a 'Recent Articles' sidebar containing three article previews, each with a small image, title, and timestamp (7:00 am on Feb 28). The bottom of the page shows a partial view of another article with a microscopic image.

Administration Users Page

Each users (Patients and Doctors) could sign in and have an administration page with sections like My Wallet, My Profile, Articles, etc.

The screenshot shows the 'Editing Doctor' profile page in the Homeagora application. The header is blue with the Homeagora logo, 'Follow Us', 'Languages', and a welcome message for Manuel Fernandez. The navigation bar includes 'My Wallet', 'My Profile', 'My Articles', and a search box. The main content area is titled 'Editing Doctor' and features an 'Avatar' section with a profile picture of Manuel Fernandez. To the right of the avatar are input fields for 'Name' (Manuel Fernandez), 'Email' (manfergo25@gmail.com), and a 'Bio' text area. Below the bio is a 'Change my profile picture' section with a 'Browse...' button and the text 'No file selected.' A blue 'Update my Profile' button is located at the bottom left of the form.

General Administration Page

An administration page where the admins manage the platform.

The screenshot shows the 'Administration' dashboard page in the Homeagora application. The header is orange with the 'Administration' logo, 'Languages', and a welcome message for Manuel Fernandez. The navigation bar includes 'Dashboard', 'Users', 'Articles', 'Images', 'Categories', and 'Tags'. The main content area is titled 'Dashboard' and features three columns of information: 'Statistics' with '4 Doctors' and '1 Patients', 'Recent Posts' with three entries, and 'Recent Users' with three entries: Manuel Fernandez, Manuel Fernandez, and Juan Romero, all joined 3 months ago.

Doctors

Doctors are the most important users of the system. They give HEAL to the others users. They are the ones who set the roadmap of the platform and it is important that they believe in the project and are involved in the community that is why they will become shareholders from the very beginning.

As mentioned before each homeopathic doctor will have their own domain and will look like a separate profile page. Only doctors have this special feature.

The screenshot shows a user profile for Diego Risquez Harris. At the top left, the name "Diego Risquez Harris" is displayed in purple. To the right is a navigation menu with links for "EN", "ABOUT", "ARTICLES", "CONTACT", "SIGN IN", and "SIGN UP", along with a hamburger menu icon and a search icon. Below the name is a circular profile picture of an elderly man with a white mustache and glasses, wearing a white lab coat. Underneath the photo is the name "Diego Risquez Harris" and three social media icons for Facebook, Twitter, and Instagram. A section titled "About me" follows, containing a paragraph of text: "Diego Risquez Harris is a surgeon, graduated from the University of Zulia with a post-graduate degree in pediatrics at the Pédiatrica Clinic of the University of Rome. He was a founding member of the Venezuelan Foundation of Homeopathic Medicine. In 1969 he had his first contacts with Homeopathy, and since 1973 he has been attending private consultations such as Homeopath, in Caracas, Venezuela. He is the author of the books Homeopathy, Vitalist Medicine and Reflections. Coming from a family of recognized doctors, trained in allopathic medicine, he is currently one of the most consulted homeopathic doctors in Venezuela." At the bottom of the page, there is a dark footer with the text "Copyright ©2021 All rights reserved | Privacy Policy | Terms of Service" and three social media icons for Facebook, Twitter, and Instagram.

Doctors need to be validated in some way. It is not enough to sign in and say you are a doctor. It is needed a verification and a personal (human-human) interaction to validate a doctor.

Doctors will have access to the information of their patients and could manage and update some of this information.

Patients

Patients are the the rest of types of users apart from doctors. Their basic feature is to validate (like) and comment publications and articles. They will not be able to have their own domain and will not be able to have access to information from other users.

Roles

Doctors and Patient could have different roles depending on the level of validation. They different types of roles are: admin, healer (only for doctors), validator, editor, translator.

Admin

This role is for the superusers that manage the platform.

Healer (Doctor)

This role is set to Doctors after a validation. With this role doctors could set their own website and starting to getting patients.

Validator

This role is set to any user and only admin could defined. This role also need to have a personal interaction with doctors. Because it is needed a personal (human-human) interaction to validate a doctor. A validator visit a doctor to see if this doctor could be certified homeopath. Maybe he could made the first interview of the doctor. They must have certain level of understanding of homeopathy and with the ideal scenario of validate his own doctor. One doctor for one validator could be the best approach because the validator will be rewarded also if the doctor have a great impact on the community.

Editor

This role is set to any user and only admin could defined. This role could validate, translate and write publications of any type of users. They have access to all articles.

Translator

This role is set to any user and only admin could defined. This role could translate publications of any type of users. They have access to all articles.

Workflow Diagram

HEAL Token. Blockchain.

In order to create this network with the highest standards of transparency and quality, this application will work under blockchain technology with the HEAL token.

HEAL token will be a EOSIO token (Proof of Stake PoS Technology).

Utility of HEAL token

- Validators have to stake HEAL tokens in order to validate Doctors
- Doctors will receive HEAL tokens once they are validated and they could use them to make their own website, promote and use many features to interact with their patient
- Patients can receive HEAL tokens if they write high quality reviews and validate articles (like). Patients could use the HEAL tokens to pay a part of the consultation with his doctor.
- Translator receive HEAL tokens in reward for translate content in different languages

Specification of HEAL token

- ERC-20 and EOSIO proper utility token
- Token name: HEAL
- Symbol: H (Unicode character U+1E2A, HTML entity $\&\#7722;$)
- Max supply: 100,000,000 HEAL
- Max digit: 18
- Initial circulation supply: 10,000,000 HEAL
- Initial price: 1 dollar cent

Value of HEAL token

At the beginning there will be no public circulation of the token until the project and the community reach a maturity. The value of the HEAL token will be defined in the first instance by the doctors. Doctors will receive a share portion when there are validated and they will define what portion of their service could be payed with the token so this way they will set the value of the token. Also because they are shareholders they will benefit with high value token.

A validator needs to stake 10,000 HEAL in order to validate a doctor. This tokens will be block and the doctor will receive the same amount of this tokens (10,000 HEAL). Each time the doctor consume this tokens using the application or receiving HEAL tokens from patient for medical consultations. When this happens the validator tokens will be unblocked and rewarded with more tokens incrementing his quantity of HEAL.

Market and Business Plan

Our estimated users for the first year is 5,000. With a 2% of doctors (1 doctor for every 50 users). So will be 100 doctors.

This means that we will need 100 validators in the worst scenario. And the application will give away the quantity of 10,000 HEAL for every doctor and validator. This means that is expected 2,000,000 (\$20,000 at 1 cent per token) HEAL tokens (2% of max supply) will give away the first year.
